I am a **Junior Backend Developer** at the beginning of the journey, focused on applying the principles of engineering to software development. Strong in design and integration with intuitive problem-solving skills, passionate about implementing and launching new projects. Ability to translate business requirements into technical solutions. Looking to forward my career as a Sr. Backend developer in a software company that thrives on creativity and customer-oriented values. I tend to embrace working under pressure because it forces me to become the best version of myself and act in a quick and decisive manner.

Skills

- Java
- Spring Boot
- Microservices
- Staff leadership and development
- Business performance improvement
- Pressure management
